

## CHAPTER-8

# Recommendation

---

Market linked supply chain need to be created for direct selling and fetching better return.

1. Transformation of marketable surplus into marketed surplus needs to be created by providing better market corridor, value addition process and supply chain.
2. A change of agricultural policy is warranted to promote higher entrepreneurship among the farmers and rural un employed youth.

### **FUTURE SCOPE**

1. The empirical research needs to be replicated in similar or different research locales to get the interaction and variance of variables more standard and stable.
2. Inclusion of more number of innovative and relevant frameworks can be done for future.

## Recommendation

---

3. An independent research on policy research on the above selected crop enterprise can go a long way for better socialization and relevant intervention.
4. An configuration can be possible if future research can include a new paradigm and same enterprise or same paradigm with new enterprises for its dynamic modelling in the wider preview.
