Abstract—

1. *Architecture & Urban Planning*
2. *Huge Population Intense Planning*
3. *Improve Business and Opportunities by Proper Architecture & Urban Plan*
4. *Improve Health by Proper Urban Plan*
5. *Save Time by Good Urban Plan*
6. *Save Cost for Millions of People of our World*

1. INTRODUCTION

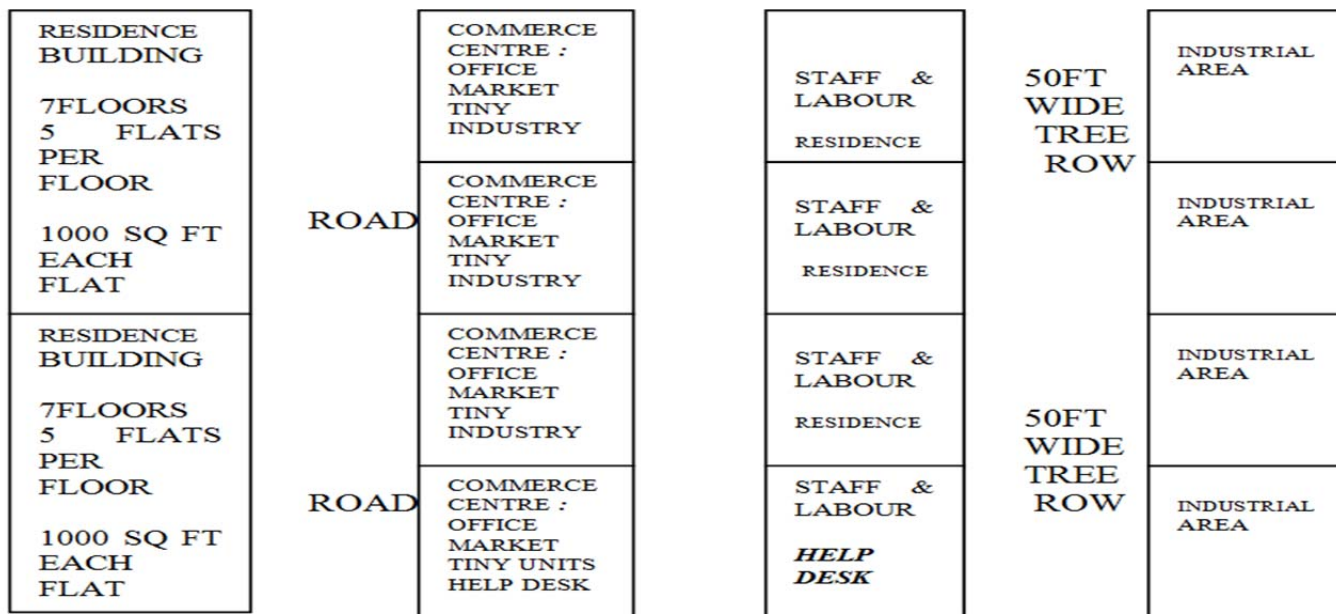

Design of our Home – “ This World “ Biggest Challenge : Of our world is how to accommodate growing population and with manage so many streams like pollution, easy / cheap / fast transportation, healthy living, ecosystem, business, society etc. We would find in this literature solutions to all sorts of problems faced by this world just by simple, feseable, sustainable architecture & urban design.

2. MAIN TEXT

We need mother nature, we need business, we need peaceful living and designing can help do that. Shop / office / residence in walkable visinity will promote walking habbit, reduce traffic, decrease pollution, save money on conveyance, government will save money on constructing and managing transportation. Then we use our car not for annoying traffic jam but for moving around for fun at night or a family friends picnic. Safe air to breath . Safer roads and lesser roads.

3. ACKNOWLEDGEMENTS

Greatest truth and acknowledgements is implication of simple ideas which a common has. They cannot reach or communicate it with government. Rajesh Nahata(Mumbai), Pandey ji (Senior Editor / Politician Bihar), Vineet Sharma, Rakesh Jain, Kanjilal Shubojyoti (Bondel), Sanjib Senapati (Odisha) Kolkata Acknowledge that such a urban plan for any nation is great.

4. CONCLUSION :

Time is what we will save and example is what we will set for the world. In above table residence and commerce centre is near so people will save time & money in travelling government will save time making infrastructure.

Rate of real estate would also be in control.

Equal feeling among poor class human beings as they get healthy living near about workplace and save time.

Architecture would streamline in many ways manufacturing of windows, doors, cement etc etc construction materials.

Industry would have better / happy labours, staff, managers, investors.

Above tree row can also be used partially for agriculture & that too again :

Happy Kisan As He Will Get Rate

Happy people as food bill lesser and food more fresh

Pollution reduced

Human Efficiency ++

Life more lovely

World a better place

Lets make our home sweet home

REFERENCE

Rakesh Jain businessman Kolkata faces problem in buying home – a proper urban plan can reduce his problem Sanjib Senapati in job

Has to stay away from his family in Kolkata to work in Odisha . He could get a job in Kolkata which the above plan ensures (help desk in commerce centre and staff & labour unit

Above)

Rajesh Nahata businessman in Mumbai has to travel 2 to 3 hours daily for home – office.

He requires the above city model. He can spend more time & energy in work

Krishnamurthy (Chennai) in job

Cannot deliver performance as per his boss choice as travelling to one prospective client many a times take him a full day

Ramakant Koli (Mumbai) in job

Has to leave his agency of pigment company after 3 months of starting as visiting a client in mumbai so time taking and costly.

Slideshare.net shows increase of asthma and copd patients 28million & 17million in 2006 to 35million & 22.2million in 2016 respectively.

The Indian express shows Wazirabad – Tronica city bridge 11traffic police deployed for one bridge and so many times traffic is stand still for 4.5lac vehicles.

Ndtv.com shows 137000 people in india dies by road accident – organised urban design can reduce it by 40%.

Economic policy institute says in its report that us economy investing 18billion would generate 29billion of business.

Report in Kotak securities.com shows numerous cases in court, export slow for infrastructure, land acquisition problems, increase in energy cost rise.

Lakhs of such references are in our world which would definately force us to think / apply the above pattern for the benefit of our humanity.
